

Feu vert à l'acquisition, par la société Korian, du groupe de soins psychiatriques Inicea

Published on December 10, 2020

Korian notified the Autorité de la concurrence of its plan to acquire exclusive control of the Inicea group, which operates psychiatric care establishments.

The transaction mainly results in an overlap of activity in the market for the supply of psychiatric care in which both parties to the transaction operate. However, the Autorité considers that the transaction will not modify the structure of competition in this market and that it is therefore not likely to reduce competition.

Due to the respective activities of the parties, the transaction could also lead to vertical links between their diagnostic and hospital care activities and Korian's follow-up and rehabilitation (SRH) activities. However, any negative effect resulting from the transaction was ruled out given the low rate of patients' transfer from psychiatric care to units offering SRH and the very limited number of SRH establishments of Korian in psychiatry.

Finally, the Autorité ruled out any competitive risk of vertical integration between the offer of psychiatric care and the long-term accommodation services for the elderly offered by Korian.

The Autorité thus cleared the transaction unconditionally.
